Open Position Request

Position Requested: Web Developer

Status: Summer Internship

Location: Charleston, SC

Requested Start Date: June 1st., 2013

Introduction:

Atlatl™ Software is in the process of developing and marketing several Sales Resource Planning (SRP™) applications. "DART™" includes two (2) modules: the Product Configuration Module and the Quote Management Module. "SPEAR™" is a customer relationship management-like application. It utilizes what we call a "Customer Engagement Engine" to help salespeople become more effective and successful.

Position Description:

We are looking for an individual to work as a Web Developer, proficient in Python and Ruby, to join our software development team as a paid contractor for the summer semester.

Atlatl offers you:

- **Empowerment** – we believe in the power of our people and what they bring to the table.
- **Challenge** – we believe in pursuing and producing the highest quality of cutting edge technology.
- **Excellence in Execution** – we believe and thrive on a balance of innovation and production.
- **Core Values** – we believe strongly in our core values, live them, and grow within them each day.
- **Trail Blazers** – we believe in being the first to pave the way in our industry and every person on our team is a trail blazer in their own right.

Specific Responsibilities: (include but are not limited to)

- Work directly with our existing team of web developers to obtain a firm understanding of the structure of the database and the code base (current state).
- Work closely with Atlatl personnel to identify and fix software discrepancies (bugs) and to add certain features
- Work with Atlatl's Quality Assurance department to support any additional product testing.
- Support the UNITY team when integration between the Product Configuration Module and the Quote Management Module is required.

Essential Qualities:

- Excellent communication and collaborative skills.
- Passion for product quality and attention to detail.
- Comfortable with rapid development cycles, tight schedules.

- Proven problem solving skills, and communication skills for both technical and non-technical audiences.

Other Qualifications:

- Familiar with Python and Ruby. Django, JSON and object oriented programming a plus.
- Pursuing BS degree in Computer Science a plus.
- HTML/CSS experience a plus.
